Statistical press release

Between March 2016 and March 2017, the increase in deposits from the resident non-banking sector was largely attributable to its main component, that is to say deposits from the OFI sector, which had a share of 70.5% as at 31 March 2017 and comprised deposits made by monetary and non-monetary investment funds. Indeed, over the last twelve months, resident OFI deposits increased by 10 102 million euros, or 6.7%.
