Consumer Confidence Survey

Consumer confidence stabilises in June 2018.

The Banque centrale du Luxembourg's consumer confidence indicator has stabilised in June 2018.

The components of the indicator have evolved heterogeneously this month.

In June, households' expectations about both the general economic situation in Luxembourg and their personal financial situation have deteriorated. In the meantime, households have favourably revised their expectations about both unemployment in Luxembourg and their capacity to save. In total, the consumer confidence indicator, which is the arithmetic mean of the four components¹, has stabilised in June 2018.

The results are presented in the table below:

¹ The four components of the consumer confidence indicator are seasonally adjusted.

Note: The consumer confidence indicator results from the average of balances related to consumers' expectations of (1) the general economic situation and (2) unemployment (inverted sign) in Luxembourg, of (3) their financial situation and (4) their future savings. Balances are constructed as the difference between the percentages of respondents giving positive and negative replies. In terms of unemployment, a positive reply means an unfavourable development in the labour market.
