CONSUMER CONFIDENCE SURVEY

**** Important notice:

The Banque centrale du Luxembourg has revised the composition of its consumer confidence indicator. As of January 2019 and in line with the European Commission's revised methodology¹, the Luxembourg consumer confidence indicator results from the average of the four balances related to: (1) consumers' expectations of the general economic situation in Luxembourg; (2) the perception of their financial situation over the past 12 months; (3) their expected financial situation over the next 12 months; and (4) their intended spending on major purchases (furniture, electrical devices...).

The revised Luxembourg consumer confidence indicator has been recomputed over the entire historical period (January 2002-December 2018). ****

Consumer confidence rebounds in May 2019.

The Banque centrale du Luxembourg's consumer confidence indicator has rebounded in May 2019.

The components of the indicator have evolved in contrasting ways this month. In May, households' expectations of the general economic situation in Luxembourg have receded while both their perceptions and anticipations of their financial situation were noticeably revised upwards. In the meantime, consumers' intentions in terms of major purchases have stabilised.

In total, the consumer confidence indicator, which is the arithmetic mean of the four components², has rebounded in May 2019.

The results are presented in the table below:

² The four components of the consumer confidence indicator are seasonally adjusted.
