

Ref.: ST.22-0438

Luxembourg, 15th July 2022

To the attention of the reporting agents

Subject: Collection of granular credit and credit risk data sets (AnaCredit)

Madam, Sir,

We wish to inform you the Central Bank of Luxembourg (BCL) has just updated the AnaCredit part of its website. The update includes the following elements:

- An update of the list of reporting agents, the list of SDMX schemas valid for each reference date and the comparison methodology iBSI-iMIR
- The publication of the SDMX schemas 1.0.7

The SDMX schema version 1.0.7 will become applicable from the 25th September 2022 (included) onwards. As of version 1.0.7 of the SDMX schemas, the functioning of submissions and resubmissions will change. For the time being, reporting agents are requested to always submit submissions and resubmissions in the latest version of the SDMX schemas. Once version 1.0.7 will be applicable (25.09.2022), all submissions and resubmissions will have to be made using the version of the SDMX schemas in force on the relevant reference data. As an exception, all submissions and resubmissions for the periods from September 2022 and earlier shall be made with the SDMX version 1.0.7 (as soon as it becomes applicable).

To improve the view of applicable versions of SDMX schemas by reference date a new document has been published on the BCL website ([List of SDMX schemas valid for each reference date](#))

For further information on the AnaCredit collection, please contact directly the banks section (email: reporting.anacredit@bcl.lu).

Please accept, Madam, Sir, the assurance of our highest consideration.
