Customer category

The dimension «Customer category» has been enhanced in order to improve the quality of data transmitted to the ECB and to satisfy new BCL needs

Concerns credit transfers, direct debits, R-transactions, stock of accounts
(current)

- **New possible values:**
 - Electronic money institution
 - Payment institution
 - Households and NPISHs
 - Non-financial corporations
- **Other new possible values:**
 - Own account operations
- **New meaning of existing possible values:**
 - The reporting agent's own account operations are reported separately from «credit institutions»

Customer category – additional details

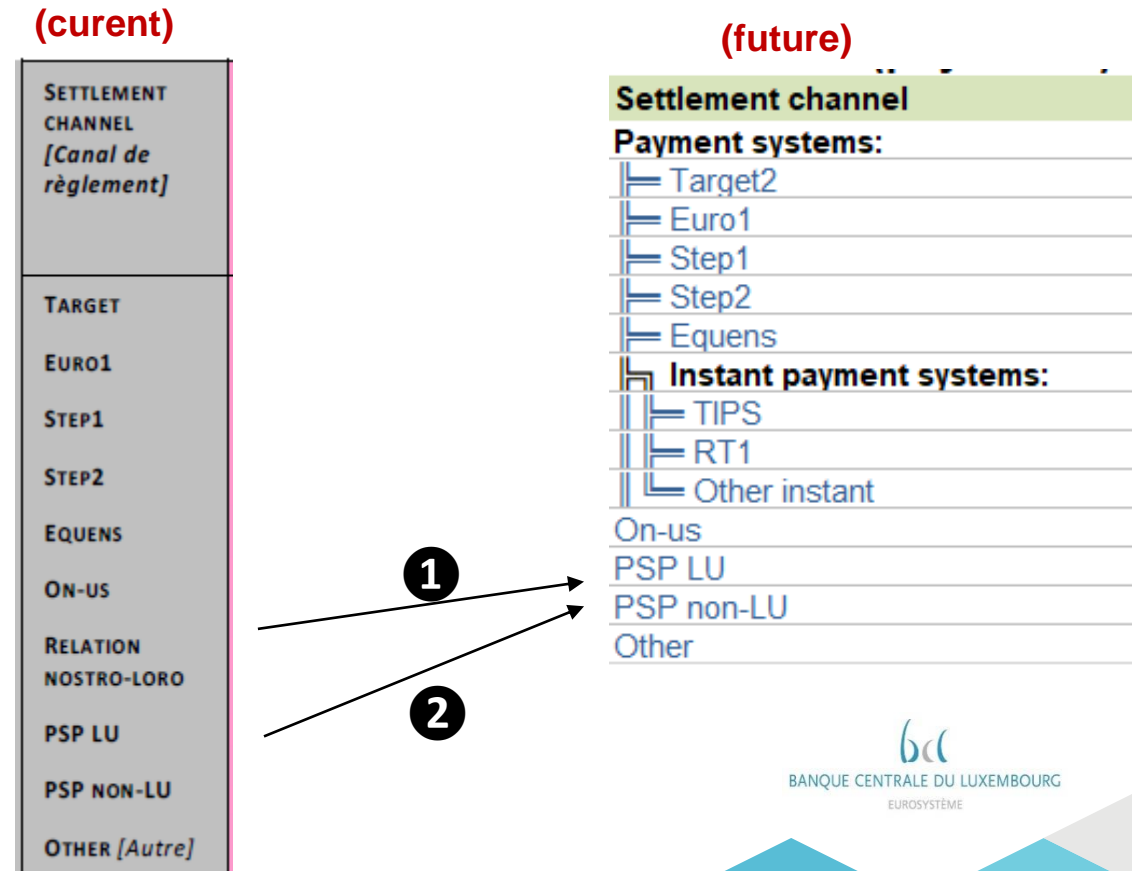

- See sheet “Customer category” for correspondence with other tables in the BCL

Settlement channel

The dimension «Settlement channel» has been enhanced in order to improve the quality of data transmitted to the ECB

- **New possible values for instant payment systems:**
 - TIPS
 - RT1
 - Other instant
- **Relation nostro-loro:**
Settlement channel RELATION NOSTRO/LORO is merged into PSP LU or PSP non-LU. The distinction between Nostro/Loro and PSP is not requested anymore.

Credit transfers sent

- **Reporting table: V1.20 (former V1.1.1)**
- **The dimension/split “Initiation channel” has been enhanced according to ECB new requirements:**
- MPS payments collected (ex: CT resulting from a DigiCash P2P or POS payment)

Mobile Payments Solution (MPS): *A solution used to initiate payments for which the payments data and the payment instructions are transmitted and/or confirmed via mobile communication and data transmission technology through a mobile device. This category includes digital wallets and other mobile payment solutions used to initiate P2P (person-to-person) and/or C2B (consumer-to-business) transactions, i.e. credit transfers, card payments and/or e-money transactions. (ECB Draft manual on payment statistics).*

- Online banking e-payment renamed e-commerce payment for more clarity
- **The following new splits have been added:**
- Payment scheme: SCT, SCT inst, Non-SEPA (ex: TARGET2 payments), Not applicable (ex: ONUS payments)
- Initiation sub-channel: remote / non-remote.

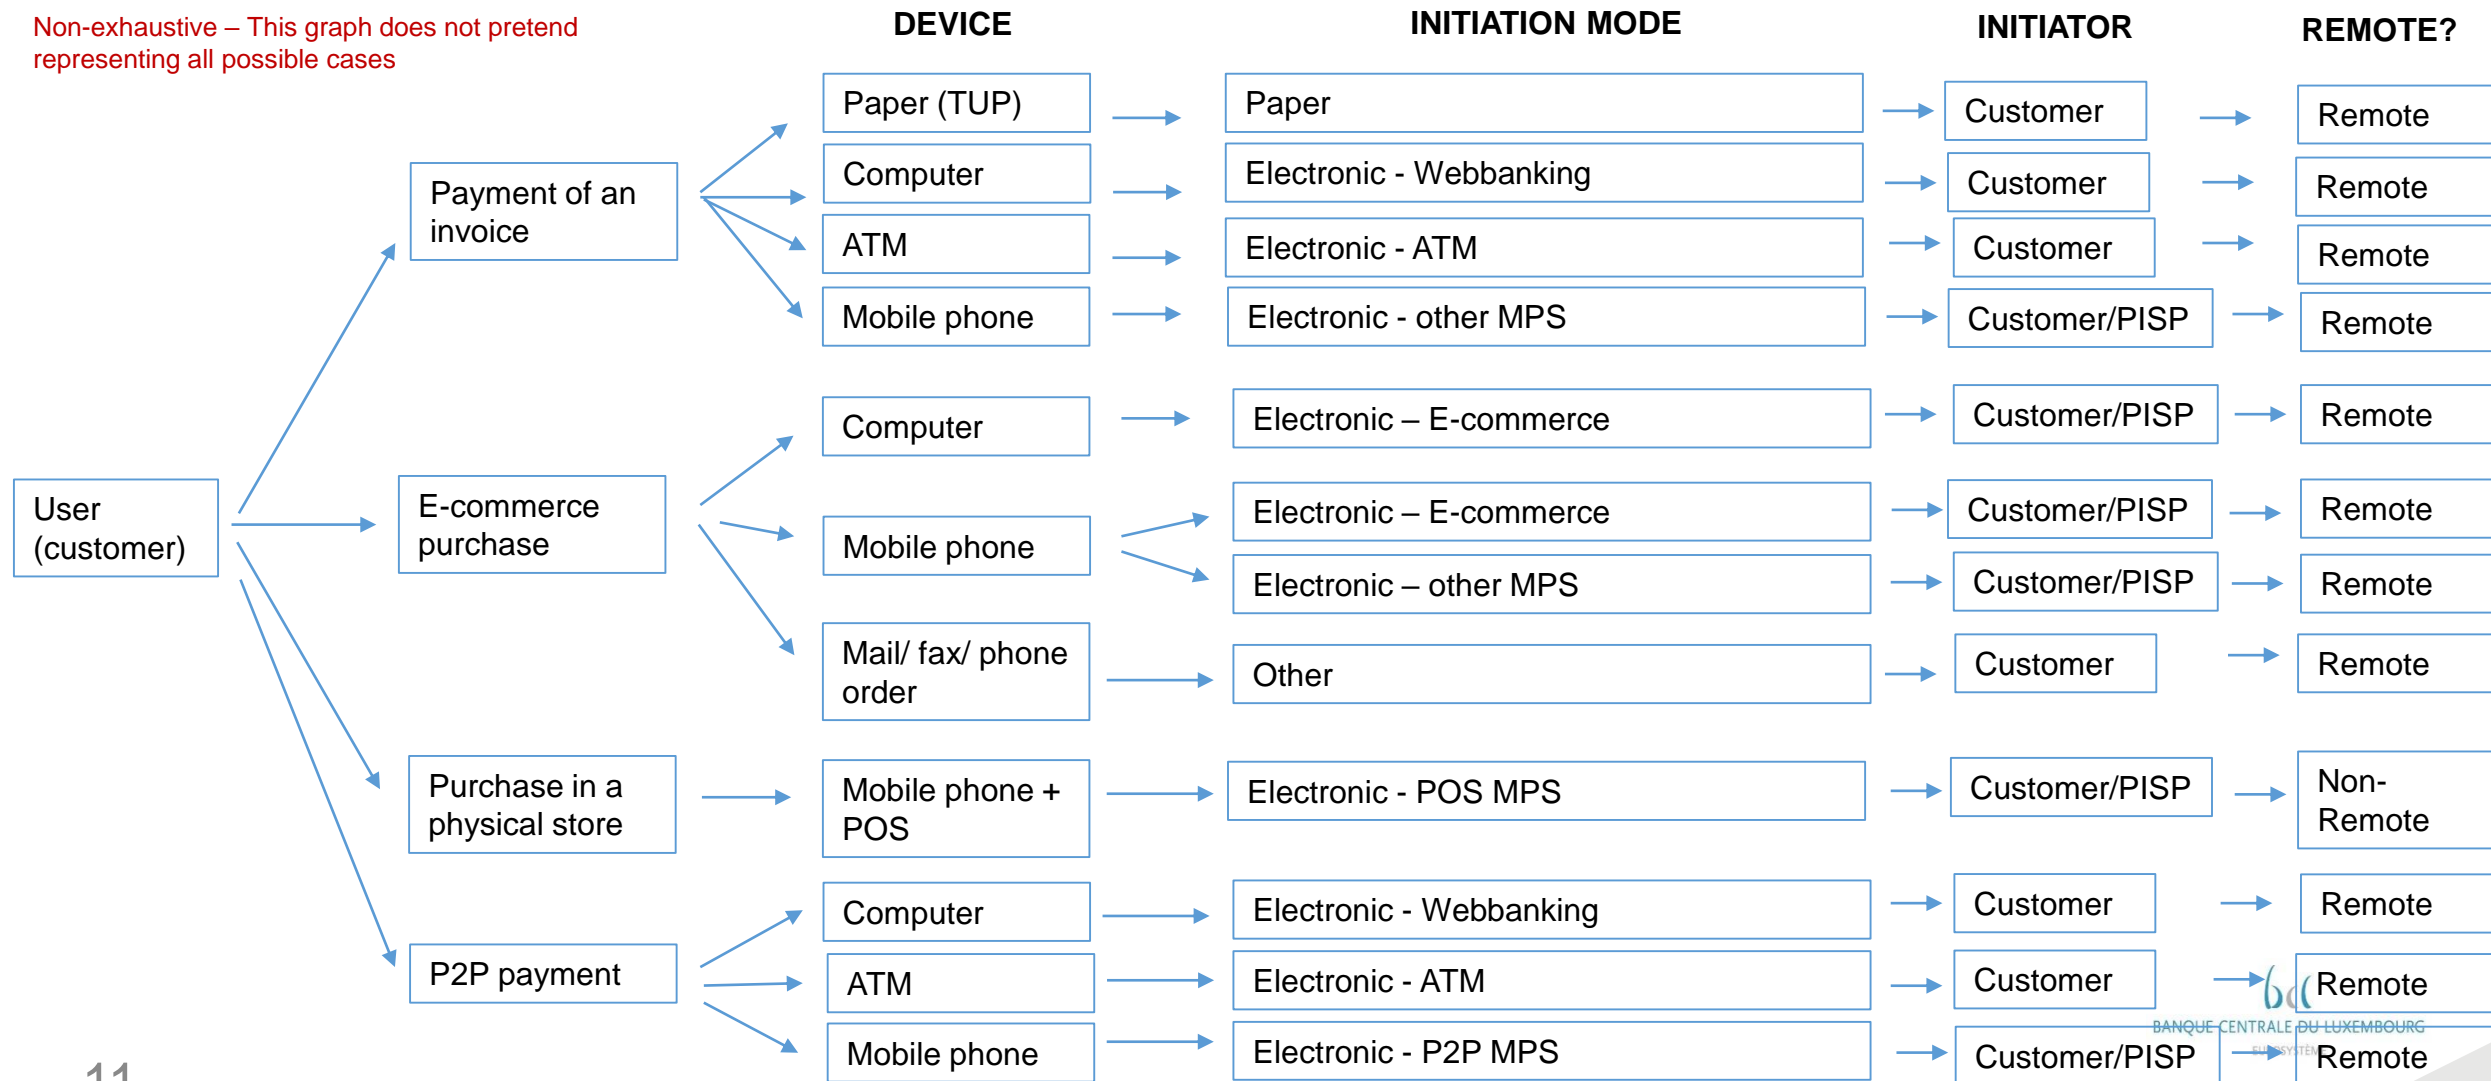

Remote payment transaction *means a payment transaction initiated via internet or through a device that can be used for distance communication (PSD2).*

- Initiator type: customer / PISP indicates if the CT was initiated by customer herself or by an payment initiation service provider (PISP).
- SCA: SCA used or reasons for non-SCA
- Fraud type: this split has been added for having a perfect symmetry between V1.20 and V1.20F only.
