Document Change Log

1. INTRODUCTION

The TARGET Registration and onboarding guide (from now on "the guide") is intended as the companion to the TARGET Registration form (the Form) and must be consulted during the process of completing the form. The guide intends to describe exhaustively the fields required in the CLM, RTGS, TIPS and T2S Cash registration forms.

In addition to this, the guide also describes the onboarding process that needs to be followed by the participants that want to connect for the first time to TARGET.

This guide is intended for the creation of Parties related to EURO and DKK currency business.

1.1. OBJECTIVE, SCOPE AND STRUCTURE

The objective of the guide is that it will assist the completion of the form whether for the Production environment or one of the test environments. The document covers the registration procedure and describes every reference data field on the form and the onboarding process. The document is structured in a logical fashion following the form itself. It is not intended as a replacement for the Common Reference Data Management (CRDM) User Handbook. The latter describes all reference data fields available in the CRDM while the registration form and the guide only describe the subset of fields that are loaded into the CRDM component on behalf of the participant/National Central Banks (NCB).

1.2. COLLECTION OF REFERENCE DATA FOR TARGET (RTGS AND CLM, T2S-CASH AND TIPS)

The reference data will be collected in the submitted form according to the procedure outlined below. The registration form is designed to allow that one form can be used and submitted for defining all the participant's reference data across services. The form is designed so that the participant may create e.g. multiple cash accounts or multiple system administrators. NCBs may decide that a separate form is needed per service.

1.3. COLLECTION OF REFERENCE DATA FOR TEST AND PRODUCTION ENVIRONMENTS

Reference data for each environment can be inserted in the registration form. The participant must ensure that the reference data entered is intended for the environment selected in field 4 of the registration form. For the first registration or for a new reference data element or for a modification only one form per environment is allowed. In the case of a deletion multiple environments may be selected on the form.

1.4. AVAILABILITY OF FORMS

The registration form will be made available by each of the NCBs, which should always be contacted if and when there are questions in the scope of participation and/or any other updates to reference data.

1.5. PROCEDURE FOR SUBMISSION AND VERIFICATION OF THE TARGET SERVICES REGISTRATION FORM

Participants must consult the guide in order to fully complete the relevant registration form. The registration guide is available for download on the website of the European Central Bank (ECB) or the responsible NCB.

Once completed the form must be sent to the NCB.

The form may be accepted by the NCB in the following formats (it is up to the NCB to define which formats can be submitted):

- 1. Printed, signed and sent by post
- 2. Printed, signed and sent by fax
- 3. Printed, signed and sent by e-mail
- 4. Electronically signed
- 5. By electronically signed e-mail
- 6. By electronically signed transmission other than email.

The NCB will enter the relevant data into the CRDM based on the registration form sent by the participant. Once the participant receives access to the CRDM they must check that the data is exactly as stated on the form. Any discrepancies must be reported to the NCB.

In case of modification or the creation of a new reference data object (e.g. new cash account) the Form allows the Participant to fill in only the relevant parts. They must consult the guide and carefully check the chapters that apply to their needs. These will depend on the current status (active participant vs. new joiner) as well as the services to subscribe/modify and the participation type for those services.

The NCB is responsible for defining the rules whether the form can be partially filled-in or it should be always filled-in entirely.

1.6. DUAL PARTICIPATION

For Participants with more than one type of participation separate forms must be completed e.g. an Ancillary system which is also a Payment Bank.

1.7. ROLES AND RESPONSIBILITIES IN THE FORMS COLLECTION PROCESS

1.7.1. THE NATIONAL CENTRAL BANKS (NCBs)

The respective NCBs will receive, verify, and process all forms.

1.7.2. THE TARGET PARTICIPANTS

The TARGET Participant submits the correctly filled out form to its respective NCB by the means defined by that NCB as defined in the chapter 1.5.

1.8. ACCESS RIGHTS MANAGEMENT

Access rights management in TARGET Services is based on the concepts of privileges and roles as well as the concept of party administrators. A privilege is the capability of triggering a certain function (for example, to perform a given query). Privileges are grouped into roles. The access rights profile of a given user is determined by the set of roles and privileges granted to it.

Each entity/party must have at least one party administrator, i.e. a user that may grant any roles and privileges previously granted to its entity. A role becomes available to a party administrator after this role has been granted to this party. From this moment on, the party administrator can grant this role. I.e., after the configuration of access rights at party level has been set up for a given party, its party administrator(s) can perform the configuration of access rights at user level, in order to assign the appropriate roles and privileges to all the party users. The roles are granted based on the roles selected in the registration form.

The form allows for the creation of two administrator users, should further administrator users be needed the participant must create them themselves. The original administrator users may grant the new administrator users with all the relevant roles.

2. ONBOARDING TO RTGS AND CLM

2.1. ONBOARDING INTRODUCTION

This document outlines the principles for the onboarding of new participants, with a focus on detailing the steps towards participation in the production environment.

New participants can connect to the system as soon as they have completed the connectivity and interoperability testing activities and mandatory tests and are ready to send payments to and from CLM and RTGS on a date bilaterally agreed between the new participant and its NCB.

This chapter aims at providing an overview of all the available information to support the onboarding and testing of new T2 participants. Further documentation such as the User Defined Functional Specification (UDFS) is available <u>under TARGET professional use documents & links in the ECB website</u>.

2.2. THE EUROSYSTEM FMI

CLM and RTGS is a harmonised and standardised pan-European Real Time Gross Settlement service with common functionality across different countries and jurisdictions for settling large value payments in Central Bank Money.

Cash accounts in euro and DKK are legally opened by the responsible NCB. Cash account (along with T2S and TIPS cash account) balances are taken into account for the calculation of the minimum reserve and marginal lending facility.

The use of TARGET Services is subject to fees as outlined in the TARGET Services Pricing Guide published on the ECB website¹.

2.3. ESMIG, CRDM AND TIPS

The Eurosystem Single Market Infrastructure Gateway (ESMIG) provides the single access point for the external communication to the Common Reference Data Management (CRDM), to CLM and RTGS and eventually to all the other TARGET Services. This means it is in charge of A2A and U2A traffic management providing authentication of all inbound traffic (U2A and A2A) as well as sender (i.e. external party sending communication) authentication and identification.

The connectivity guide available on the <u>ECB website</u> provides information about how to connect to ESMIG.

¹ See https://www.ecb.europa.eu/paym/target/coco/shared/docs/ecb.pricingcoco_target.en.pdf

The Common reference data module (CRDM) reduces the effort required to create and maintain multiple copies of reference data and centralises the management of user access rights. The configuration of reference data is done in the CRDM.

TIPS Participants are asked to also consult the <u>TIPS onboarding guide</u>.

2.4. CONNECTIVITY GUIDE

The aim of the Connectivity Guide is to explain how to establish a technical connection to the TARGET services through ESMIG and to describe the process to be followed to register to the system and to select a Network Service Provider (NSP).

2.5. ECONS II CLOSED GROUP OF USERS

NCBs and participants will need to join a separate closed group of users (CGU) for the ECONS II Service.

2.6. NETWORK SERVICE PROVIDERS (NSP)

The list of NSPs providing connectivity to ESMIG and to the TARGET Services is available on the ECB website. Currently, Nexi and SWIFT provide this service.

2.7. Nexi CUSTOMERS

Once the contractual relationship is established between Nexi and the Customer, the procedure consists of the following steps:

- 1. User Registration: Nexi registers the Customer in the SIAnet.XS Portal.
- 2. **Domain Join**: the Customer defines its Technical Address and subscribes to a Closed Group of Users
- 3. Configuration phase: Nexi implements the addressing configuration

2.7.1. Nexi USER REGISTRATION

The customer is requested to provide Nexi with the User Administrator Appointment Letter to register the initial Customer user in the Portal.

This user represents the initial user administrator and its main duty is to create other Customer's users in the Portal. It is suggested to register at least two initial user administrators.

2.7.2. Nexi DOMAIN JOIN, I.E. SUBSCRIPTION TO ESMIG CLOSED GROUP OF USERS (CGUs)

Adhering to the ESMIG Technical Requirement, the Domain Join workflow available from SIAnet.XS Portal enables ESMIG Directly Connected Actors (Di.Co.A) to join ESMIG CGU. The request is initially verified by Nexi, and then it is authorized by the relevant NCB and/or CSD (if applicable) and, in the end, approved by the ESMIG Operator. A Domain Join is requested for each CGU, i.e. for A2A and U2A for each Business Service for each environment (EAC/UTEST/PROD).

During this phase, the ESMIG Di.Co.A defines and provides its Business User address (BU), i.e. the Technical Address used for exchange of A2A messages.

This Technical Address should match the value reported in the registration form for registering the Party in CRDM.

2.7.3. Nexi CONFIGURATION PHASE

Once the CGU request has been approved by the ESMIG Operator, Nexi implements the A2A/U2A addressing configuration. The addressing configuration is then made available over the SIAnet.XS network nodes.

In addition to the previous steps, the Customer is requested to setup the security parameters needed for authentication, non-repudiation, encryption, i.e. certificates and LAU Key.

2.7.3.1. CERTIFICATES MANAGEMENT- Nexi

- <u>A2A certificates</u>: The Customer Security Officer requests through SIAnet.XS Portal the digital certificates used for authentication and non-repudiation between the SIAnet.XS network gateway to exchange traffic. The enrolment procedure is fully automated, and the certificates are stored in HSM module embedded in SIAnet.XS network gateway.
- <u>Business Layer Signature (BLS) certificates</u>: The Customer Security Officer requests

 through SIAnet.XS Portal the digital certificates used for Business Layer Signature.
 The enrolment procedure is fully automated, and the certificates are stored in HSM
 module embedded in SIAnet.XS network gateway. Optionally, BLS certificates can be
 stored in secure stores provided by the Customer: in such a case, no additional
 functionality is available from SIAnet.XS network gateway supporting the Business
 Layer Signature calculation and verification processes.

- <u>U2A certificates</u>: The Customer Security Officer requests through SIAnet.XS Portal the digital certificates used for authentication and non-repudiation by Customer end users accessing the ESMIG web portal (GUI, CRDM). The enrolment procedure is managed by Customer Security Officer, and the certificates are stored in USB physical tokens supplied by Nexi or in Virtual tokens (also known as the Remote HSM solution), centrally managed by Nexi. The End User Certificate Distinguished Name should match the value reported in the registration form.
- <u>TLS certificates</u>: The Customer Security Officer requests through SIAnet.XS Portal -TLS certificates to secure the communication channels between Nexi and Customer infrastructure according to SIAnet Security Guidelines.

2.7.3.2. Nexi - LAU KEY MANAGEMENT

LAU Key: The Customer Technical Operators request – through SIAnet.XS Portal – the symmetric key to be used to secure the communication between Customer messaging interface and SIAnet.XS network gateway.

For further details, Nexi Solution for ESMIG is documented in the "ESMIG Connectivity Services - Service Description" which is available to Nexi Customers.

2.8. SWIFT CUSTOMERS

For on-boarding to the various TARGET services reached via ESMIG, SWIFT has decoupled the contractual aspect from the configuration aspect. For each of these two aspects, order forms are available at www.swift.com > Ordering A-Z > SWIFT's Solution for ESMIG

1. The "Subscribe to SWIFT's Solution for ESMIG" e-form covers the contractual aspect. By submitting the e-form, the ordering customer selects SWIFT as its ESMIG NSP and enters a contract with SWIFT in line with the Service Description of SWIFT's Solution for ESMIG. This contract covers the usage of SWIFT's Solution for ESMIG in Test and in Production, and for each selected TARGET services, such as CLM, RTGS, T2S, TIPS and in the future, ECMS. This e-form is submitted only once to cover all selected services. Any changes (for example, adding a service to the contract) can be done later as needed.

2. Specific e-forms such as the "Configuration form for T2" cover the configuration aspect which is necessary to complete for each service and for each environment in the service (i.e. test or production). The configuration form allows customers to provide the necessary configuration details of their technical infrastructure set-up (for example, SWIFTNet address and routing rules) which then leads to the provisioning of the

customer's SWIFTNet Address in the relevant Closed User Group (CUG). Upon submission of the configuration form, SWIFT will request the approval of, as applicable, the relevant NCB or CSD in addition to that of the ESMIG Operator. The approving NCB or the CSD is a field to fill on the form.

Before submitting the configuration form of the service subscription, customers need to have ordered, via the appropriate e-forms available at www.swift.com > Ordering A-Z >, all necessary components of SWIFT's Solution for ESMIG. The list of necessary components may vary depending on whether customers decide to connect directly or indirectly, or through a SWIFT-operated connectivity infrastructure, to deploy a dedicated or non-dedicated connectivity infrastructure. More information is available in the Service Description of SWIFT's Solution for ESMIG.

If a customer wants to make a change to any of the two aspects of the subscription above, this can always be requested via the corresponding Change forms, available from www.swift.com > Ordering A-Z > Change > SWIFT's Solution for ESMIG.

Customers must, before ordering any SWIFT services and products for their use of SWIFT's Solution for ESMIG, always contact their SWIFT Account Manager to discuss their specific requirements and obtain a specific quotation. Where applicable, this quotation must be referenced in the subscription to SWIFT's Solution for ESMIG and when ordering the necessary components.

2.9. TESTING BEFORE CONNECTION TO PRODUCTION

New Participants must perform testing in the pre-production test environment (UTEST) before connecting to Production as well as passing the mandatory test cases. Participants are asked to consult the User Testing Terms of Reference and the Mandatory Test Cases documents.

3. OVERALL STRUCTURE OF THE FORM FOR COLLECTION OF REFERENCE DATA

3.1. STRUCTURE OF THE FORM FOR COLLECTION OF REFERENCE DATA

3.1.1. HEADER OF THE TARGET FORM

The first nine reference data fields comprise the header of the form. Participants must ensure to select whether this is a new reference data object or a modification or deletion of an existing object. The proper environment must be selected.

The field "Activation date" in the header of the reference data form refers to the date when/to which the reference data in the form (or the changes to it) should become active in CRDM. Thus, in the case of a forms with the option "First Registration", "New/Add" or "Modify" in the header, the activation date corresponds to the opening/activation date of the reference data. In forms with the option "Delete", the activation date corresponds to the closing/deactivation date of the reference data (i.e. from the beginning of the business day indicated, the reference data will not be valid anymore). Deleted reference data objects will be purged after three months and will no longer be visible.

3.1.2. SECTIONS FOR DATA INPUT

All applicable sections in the form must be initially filled out when making a first registration to CLM and RTGS (although the party may be already defined in the CRDM due to TIPS or T2S). Please see the relevant chapters. When modifying a registration, the NCB defines whether

only the specific fields in one section need to be completed or if the entire form needs to be filled in.

3.1.3. DECLARATION AND SIGNATURE

Due to local laws every NCB will advise on their preferred method of signing the registration form (the formats for signing the form are described in the chapter 1.5).

3.2. OVERVIEW OF THE SECTIONS

When opening a party only the relevant fields to the party type should be entered in the form.

3.2.1.1. DIRECT PARTICIPATION TO RTGS (AND COMMON COMPONENTS)

For direct participation only "Direct" can be selected as one of the seven types of participation in field Participation Type, using the dropdown menu.

3.2.1.2. DIRECT PARTICIPATION TO CLM (AND COMMON COMPONENTS)

For direct participation only "Direct" can be selected as one of the seven types of participation in field Participation Type, using the dropdown menu.

3.2.1.3. DIRECT PARTICIPATION TO RTGS (U2A-ONLY PARTICIPANT)

Field U2A only under Additional party information for RTGS service link must be ticked for U2A only and "Direct" needs to be selected in field Participation Type.

3.2.2. DIRECT PARTICIPATION TO CLM (U2A-ONLY PARTICIPANT)

Field U2A only under Additional party information for CLM service must be ticked for U2A Only and "Direct" needs to be selected in field Participation Type.

3.2.3. SECTIONS/REFERENCE APPLICABLE TO ANCILLARY SYSTEMS

Section "Setting up AS procedure" is solely to be used by Ancillary systems in RTGS. This deals with the Bilateral Agreements, the setting-up of the AS procedures and the creation of Settlement Bank account group respectively. These parts will be blocked in the form for other types of participation. Chapter 7 of this guide deals with Ancillary systems.

3.2.3.1. SECTIONS/REFERENCE DATA APPLICABLE TO CB

Fields applicable only to NCBs are blocked for other types of participant.

3.2.3.2. SECTIONS/REFERENCE APPLICABLE TO OTHER PARTICIPATION TO RTGS

For "Non-Direct" forms of participation the below options are available and may be inserted in field Participation Type using the dropdown menu

- Multi Addressee Branch of Direct Participant
- Multi Addressee Credit Institution
- Addressable BIC Correspondent
- Addressable BIC Branch of Direct Participant
- Addressable BIC Branch of Correspondent

3.2.4. SECTIONS/REFERENCE APPLICABLE FOR T2S-CASH/DCA REGISTRATION

T2S Dedicated Cash Account can be selected in the dropdown menu related to field Cash account type. Chapter 8 of this document deals with the setting up of a T2S DCA.

3.2.5. SECTIONS/REFERENCE APPLICABLE FOR TIPS REGISTRATION

• DCA Holder

TIPS Account can be selected in the dropdown menu related to field Cash account type

3.2.6. INTEREST RATE

NCB are responsible for the insertion of the relevant interest rate that applies to each individual account in the system (e.g. deposit rate) and as such these cannot be selected on the registration form.

4. REFERENCE DATA FOR PARTY

This section is dedicated to the description of Party reference data that must be configured by the responsible NCB (with the information filled on the registration form) and encompasses information that is used across the different TARGET Services:

- Main information, general information on the Party;
- Technical addresses, to define the Distinguished Names (DNs) that are authorized by the Party for the different services;
- Party Service Link/s, to determine the participation type in the different services;
- Information dedicated to specific TARGET services, that is defined at the Party level;
- Access rights information, to request roles and define the operating mode according to the Party business needs. This section also describes the creation of the administrator users that are responsible to start the access rights management within their Party.

4.1. EXISTING ADMINISTRATOR USERS

Admin users previously set up for the TIPS or T2S services can operate in CLM and RTGS without any changes to the configuration apart from the granting of the relevant access rights (Roles) by the NCB. Participants are asked to include two Admin Users. These Admin Users can be either pre-existing or new ones and will be granted the relevant roles. They will manage the privileges assigned to the party, thus if the party is linked to multiple services the Party Admin will be able to administrate all these services.

4.2. REFERENCE DATA FIELDS

All items with (M) are mandatory fields, all items marked (O) are optional fields. Optional fields which are conditional upon a previous selection are marked (C)

1. Party New/Edit					
A) Main Informa	A) Main Information				
Item	Description	Data	validation		
		rules			
Party Long	Full name of the party. This is an attribute of the party	Free	field,		
Name (M)	name. It is used in several screens in CRDM, T2S, TIPS and RTGS/CLM GUIs.	Char3	350 max		

Party Short	Short name of the party. This is an attribute of the party	Free	field,
name (M)	name. It is used in several screens in CRDM, T2S, TIPS	Char36	
	and also RTGS/CLM GUIs.	Charoo	max

D2) Client Auto-	collateralisation	
-	I	Tiekhey
Client Auto-	Yes/No field to be used to indicate whether the	Tickbox
collateralisation	payment bank intends to offer client auto-	
(M)	collateralisation or not.	

	-	
	If this field is Yes, then also the field "Technical	
	address" must also be filled in.	
Technical	Conditional upon selection of client auto-collat and	max. 256
Address to send	also only to be selected if there is a requirement for	characters
daily securities	valuations via flat file. If the payment bank offers client	(UTF-8 except
valuations via	auto-collateralisation, then the technical Address to	'>','<', '&').
flat files (C)	be used for sending the valuations of securities which	
	are eligible for client auto-collateralisation needs to be	
	filled in.	
Pledge/Pledge	Checkbox to select the right type	Tickbox
sub-		
account/Repo		
D3) Secondary C	Credit Memorandum Balance	<u> </u>
Secondary	Yes/No field to be used to indicate whether the	Tickbox
CMB (M)	payment bank intends to set a secondary CMB or not.	
	If this field is Yes, then the field 49 has to be filled	
	("Repo").	
D4) Party Minim	um amount	<u> </u>
Minimum	This attribute specifies the minimum amount to be	
amounts for	sourced in an auto-collateralisation operation.	
Auto-coll (O)	In case this field is defined, auto-collateralisation for	
	the Payment Bank will always source at least the	
	minimum amount specified, even if the missing cash	
	amount to be covered by auto-collateralisation is	
	lower than the defined minimum.	
Minimum	This attribute shall specify the minimum amount to	
amounts for	be sourced in a client-collateralisation operation.	
Client-coll (O)	The amount specified with this field represents the	
	client collateralisation for all of payment bank's	
	customers. Client-collateralisation provides at least	
	the minimum amount specified in this field, even if	
	the missing cash amount is lower than the defined	
	minimum.	
H) Roles		
		1

For each role ava	ailable, the Party must define the operating mode: two-
eyes or four-eyes	s (where applicable).
The roles are do	esigned to be flexible to the business needs of the
	also to allow the segregation of functions at the user
level.	
	d to the Derty, and then menered by the edministrator
	to the Party, and then managed by the administrator
users ⁴ at the use	r ievei.
	tain privileges that can be used in Application-to-
Application (A2A) mode. These roles have to be granted in two-eyes
mode, except for	CLM/RTGS related roles.
Participants are r	equired to decide whether they will allow their users to
insert a given me	essage type in the GUI either permanently (roles: AH
RTGS Customer	CT U2A and/or AH RTGS Inter-bank CT U2A) or just
as exceptional fu	nctionality (role: AH RTGS Backup Payment Manager).
AH ESMIG	This role allows the user to access the different services.
Access	
100000	The Derty will only have exceed to the convices that have been
	The Party will only have access to the services that have been
	subscribed.
AH CRDM	This role allows the user to access CRDM.
Access	
Party	This role is the first one granted to the user administrator of the Party by
Administrator	the NCB.
	This role allows the user administrator to grant himself the other roles
	that fall under the scope of his own party.
Account holder	
Account holder	This role allows the user administrator to create/update or delete the set
(AH) Access	up for his own organization.

rights

administrator

⁴ This can be the users defined in section 3, or other users that were granted with the role "Administrator user".

	This role also allows the user administrator to have an overview of all the
	users, DN and roles set up for the Party.
AH CRDM	This role, always in 2E mode allows the user to initiate queries and view
Reader	the results in CRDM.
AH CRDM	This role allows to set up configurations (network, report, message
Configuration	subscription rules, Account monitoring group)
manager	
AH CRDM	This role allows the user to create a standing order, a limit or a liquidity
Liquidity	transfer order in CRDM
Manager	
AH CRDM AMG	This role allows the user to create and manage account monitoring
Manager	groups.
AH CLM Reader	This role in 2E mode allows the user to initiate different queries related
	to the CLM.
AH CLM	This role dedicated for CLM user allows to have an overview of the CLM
Manager	operations (reservation, overnight deposit, immediate liquidity transfer).
AH RTGS	This role, always in 2E mode, allows a Party owner of a RTGS to initiate
Reader	different queries.
AH RTGS AS	This role, always in 2E mode, is dedicated to the Ancillary System user.
Manager	This role allows the AS participant to perform all AS related tasks (i.e. submit an
	AS Transfer Initiation and Settlement bank transfer Initiation files, revoke AS
	batches, Invoke Guarantee Processing, Modify End of Settlement period and
	trigger the start/end of the procedure/cycle related to the Procedure C)
AH RTGS	This role allows a user to insert a customer credit transfer permanently
Customer CT	in U2A mode.
U2A	
AH RTGS Inter-	This role allows a user to insert a inter-bank credit transfer permanently
bank CT U2A	in U2A mode.
AH RTGS	This role allows a user to initiate immediate liquidity transfer (account
Liquidity	and sub-account)
transfer	
Manager	
AH RTGS	This role can be assigned in U2A or/and A2A and allows to initiate revoke
Payment	or delete payment.
Manager	

AH RTGS	This role allows to modify or delete a limit or reconvetion
Limit/Reservatio	This role allows to modify or delete a limit or reservation.
n Manager	
AH RTGS	This role allows the user to initiate backup payment, inter-bank and
Backup	customer exceptional payments.
Payment	This Role cannot be selected if the user has already been assigned the
Manager	AH RTGS Customer CT U2A Role and the AH RTGS Inter-bank CT U2A
	Role.
	Note: the participant also has to ask the NCB to activate the functionality.
AH T2S Reader	This role, always in 2E mode, allows the user to initiate queries and view
	the results in T2S.
AH T2S	This role allows the user to manage the liquidity of the Party.
Liquidity	
manager	The user can initiate, update, and delete liquidity transfers.
AH T2S CMB	This role is only for T2S users and allows the user to create/update/
manager	delete secondary credit memorandum balance.

4. Administrator	User		
Administrator Use	er 1		
Name	Name of the administrator user #1.	Free field,	
Administrator		Char127 max	
(M)			
Login name	Login name of the administrator user #1.	Free field,	
Administrator		Char35 max	
(M)	As the login name must be unique in CRDM, to create		
	new administrator users the following structure should		
	be used:		
	ACBPartyBIC11 +		
	max 21 characters free text.		
	A		
	CB country code (see list of the country codes in the		
	Annex E)		
	BIC=Party BIC (BIC 11).		
	Sub-classification=21 character free text		
	The free text is determined by the participant.		

	It is highly recommended that when the Admin User	
	of the participant creates further Admin Users that the	
	above structure is also used.	
	The same structure (without the initial A) should be	
	used for the creation of (non-Admin) Users.	
	For First Registration.	
	Note:	
	Admin users previously set up for the TIPS or T2S	
	services can operate in CLM and RTGS without any	
	changes to the configuration apart from the granting	
	of the relevant access rights (Roles) by the NCB.	
	Participants are asked to include two already existing	
	Admin Users from forms 7200 (T2S) and 8200(TIPS)	
	in the registration form. These Admin Users will be	
	granted the relevant roles.	
System User	Unique System User Reference (SUR) associated	Free field,
Reference (M)	with the administrator user #1.	Char35 max
	The Eurosystem recommends that the SUR is the	
	same as the login name.	
	As the SUR must also be unique in CRDM, to create	
	new administrator users the following structure should	
	be used:	
	ACBPartyBIC11 +	
	max 21 characters free text.	
	A	
	CB country code (see list of the country codes in the	
	Annex E)	
	BIC=Party BIC (BIC 11).	
	Sub-classification=21 character free text	
	The free text is determined by the participant.	

Certificate	Distinguished name of the certificate that has to be	Free	field,
Distinguished	linked to the administrator user #1 that will be	Char256	max
Name (M)	connecting via U2A.		
	The DN is composed of couples of attribute=value		
	separated by commas with a blank space after the		
	comma.		
	The DN received from the NSP may need to be		
	adapted when inserting in CRDM.		
	The CRDM format for the DN should be		
	uppercase for the attributes		
	 value should be in the case received from the NSP. 		
	Here are examples of the User DN:-		
	DN for U2A user: CN=testuser, OU=test, OU=12345,		
	O=t2s, O=swift (regardless of how many qualifiers		
	there are, they should all be written in upper case, and		
	there should be a blank space after the comma for		
	each value).		
	Please make sure that the Certificate Distinguished		
	Name complies with the specified format. In case of		
	discrepancies, align it to the CRDM rules to prevent		
	errors.		
Default User (M)	Boolean value that specifies which user is the default		
	one for the reported certificate. This user will be		
	displayed first on the list on the login screen.		
Main user	This flag must be ticked so that this administrator (or	Tickbox	
Administrator	any user) can access TIPS. This only relates to TIPS.

Administrator		Char127 r	nax
(M)			

System User	Unique System User Reference (SUR) associated	Free field,
Reference	with the administrator user #2.	Char35 max
Administrator	The Eurosystem recommends that the SUR is the	
(M)	same as the login name.	
	As the SUR must also be unique in CRDM, to create	
	new administrator users the following structure should	
	be used:	
	ACBPartyBIC11 +	
	max 21 characters free text.	
	A	
	CB country code (see list of the country codes in the	
	Annex E)	
	BIC=Party BIC (BIC 11).	
	Sub-classification=21 character free text	
	The free text is determined by the participant.	
Certificate	Distinguished name of the certificate that has to be	Free field,
Distinguished	linked to the administrator user #2 that will be	Char256 max
Name	connecting via U2A.	
Administrator	The DN is composed of couples of attribute=value	
(M)	separated by commas with a blank space after the	
	comma.	
	The DN received from the NSP may need to be	
	adapted when inserting in CRDM. The CRDM format	
	for the DN should be:	
	uppercase for the attributes	
	 values should be in the case received from 	
	the NSP.	
	Example DN for U2A user: CN=testuser, OU=test,	
	OU=12345, O=t2s, O=swift (regardless of how many	
	qualifiers there are, they should all be written in upper	
	case, and there should be a blank after the comma for	
	each value).	

Default User (M)	Boolean value that specifies which user is the default one for the reported certificate. This user will be displayed first on the list on the login screen	
Main User Administrator (M)	This flag must be ticked so that this administrator (or any user) can access TIPS. <u>This only relates to TIPS</u> .	Tickbox
6. Invoice Config	guration	
a) Invoice Confi	guration	
Service (M)	Select the Service/s to be billed:	Dropdown
	TIPS Service	
	T2 RTGS Component	
	T2S	
	ECMS	
	This information must be consistent with the services linked to the party (field 37) for CLM, RTGS, T2S, TIPS and ECMS.	
	The responsible NCB will maintain one invoice configuration per participant.	
	The participants will receive one invoice for each of the selected service/s.	
	Participants having only Main Cash Accounts in CLM are required to fill in this part even though they are not	
	subject to billing.	
VAT ID (O)	Participant's identification of the VAT, as defined by the responsible NCB.	Free field, Char35 max
Consumption Message (O)	Select if the NCB is enabled to receive the consumption message or not (only relevant for CBs).	Tickbox
Tariff (C)	Tariff that may be associated to the invoice configuration. The participant selects the tariff option (A or B) if they are a RTGS DCA holder or an Ancillary System.	Dropdown
Direct Invoicing (O)	Select whether the NCB enables BILL to directly send invoices to its participants (only relevant for CBs).	Tickbox

b) Invoice Addre	ess	
Street (M)	Enter the name of the street for the address to be used	Free field
	on the invoice.	Char70 max
House number	Enter the house number for the address to be used on	Free field
(M)	the invoice.	Char16 max
City	Enter the city for the address to be used on the	Free field
(M)	invoice.	Char35 max
Postal Code	Enter the postal code for the address, to be used on	Free field
(M)	the invoice.	Char16 max
State or	Enter the state or province for the address to be used	Free field
Province	on the invoice.	Char35 max
(O)		
Country Code	Select the country code of the address to be used on	Free field Char2
(M)	the invoice.	max
Phone Number	Enter the phone number to be used on the invoice.	Free field
(O)		Char35 max
	The following structure should be respected:	
	+ <u>012-3456789</u>	
	- Starting with "+"	
	- At least one to maximum three digits	
	- Symbol "-"	
	- At least one to maximum thirty characters (digits and	
	symbols "+", "-", "(", ")" are allowed).	
Fax Number	Enter the fax number to be used on the invoice.	Free field
(O)		Char35 max
Email Address	Enter the email to be used on the invoice.	Free field
(O)		Char254 max
C) Direct Debit fo	or the Invoice Configuration	
Direct Charging	To enable the participant to be directly debited.	Prefilled
(M)	This field is defined by the responsible NCB and	
	cannot be changed by the participant.	
	Based on the policy decision all participants will be	
	directly debited. Therefore, this field will be prefilled as	
	ticked.	

Credited	Central Bank Main Cash Account (MCA) to be	Free field,
Account (M or	credited when the invoice is charged.	Char34 max
not allowed)		
	This field is defined by the responsible NCB and	
	cannot be changed by the participant.	
Debited	Enter the MCA for the debited participant when the	Free field,
Account (M or	invoice is charged.	Char34 max
not allowed)		
	This MCA can be a cash account opened in a NCB	
	different from the NCB that is responsible for the	
	invoice configuration.	
	Two signatures are required on the form in case the	
	MCA does not belong to the participant that is being	
	invoiced.	
	The participant who is being invoiced must sign the	
	registration form and ensure that the signature of the	
	participant owning the debited cash account is also on	
	the form.	

5. REFERENCE DATA FOR CLM PARTICIPANTS

CLM participants are parties who have at least one CLM MCA (in the case of ancillary systems see chapter 6).

A CLM MCA is mandatory for TARGET payment banks having at least one DCA account (RTGS/T2S/TIPS). A Payment bank may also have only CLM MCA(s) (without any DCA).

For CLM participants the following reference data has to be set-up by the responsible CB (according to the registration form):

- Party reference data (including administrator users and invoice configuration) see chapter 3
- Cash Account reference data CLM reference data described in this chapter

The information related to Groups reference data is also available in this chapter.

In addition (after the account reference data set-up by the CB) the participant may create, display, edit, delete and restore the following reference data in the CRDM:

- Cash Account Account Threshold Configuration: setting up floor/ceiling notification flags, target amounts
- Standing/Predefined Liquidity Transfer Order: setting up standing/predefined liquidity transfers (e.g. Floor or Ceiling breach)
- Standing Order for Reservation
- Account monitoring group: setting up the account monitoring group and add members to the group
- Message subscription (including invoice in A2A using Billing Report camt.077, if offered by NCB) and Report configuration: setting-up message and report subscriptions

As each MCA must be linked to a contingency payment bank (ECONS II) account, participants are asked to contact their NCB to confirm the registration process.

For more information on reference data input, please see the CRDM User Handbook.

5.1. CASH ACCOUNT REFERENCE DATA AND OPTIONAL REFERENCE DATA

Cash account reference data (including the mandatory MCA) and optional reference data for setting up groups is described in the table in section 5.3.

Note: NCB can set up their own cash accounts.

5.2. AUTOMATED LIQUIDITY TRANSFERS

When linking accounts to create the 1:1 link for automated liquidity transfers the workflow is as follows:

1 - Create the MCA account (do not attempt to link it to any other account using field 118 "Associated LT Account").

2 - Create the RTGS DCA and link it to the MCA using field 118 "Associated LT account".

3 - Return to the MCA and now link it to the RTGS DCA by entering the RTGS DCA account number in field 118 "Associated LT account".

5.3. RULE-BASED LIQUIDITY TRANSFERS (FOR FLOOR AND CEILING)

Rule based liquidity transfers are set up as follows:

1 - The floor/ceiling amount is defined in the floor/ceiling notification amount field (via the form)

2 - The participant defines via U2A the target amount for the floor and the ceiling in the account threshold configuration and the floor/ceiling notification flag is ticked

3 - The participant defines via U2A the rule-based LT in the standing/predefined LT order screen

LT.	amount (O)		
		LT.	

	This field is used to define the value for triggering notifications and this value is also the floor amount which triggers the rule-based LT, if a target amount has been flagged in the account threshold configuration and the rule-based LT is created in the Standing/Predefined LT order screen. In case this amount is not specified, or it is set to zero, no floor notification will be triggered. In order to update this amount a new form must be	
	sent using the modify functionality.	
Opiling potification	Please see section 5.2 of this guide.	
Ceiling notification amount (O)	Upper threshold for notifying the Account Holder and also the amount that is used to trigger a rule-based LT.	
	This field is used to define the value for triggering notifications and this value is also the ceiling amount which triggers the rule-based LT, if a target amount has been flagged in the account threshold configuration and the rule-based LT is created in the Standing/Predefined LT order screen. In case this amount is not specified, or it is set to zero, no ceiling notification will be triggered. In order to update this amount a new form must be sent using the modify functionality. Please see section 5.2 of this guide.	
Linked Account Type	This field is not applicable for MCA accounts. The cash account option must be selected when creating overnight deposit accounts, marginal lending accounts or contingency accounts.	
Linked Account Reference	This field is not applicable for the creation of MCA accounts. Eligible Parties define the Linked Account Reference via the Form and then send it to the relevant NCB, in charge of the creation of the Account.	

	In apparent Marginal Landing Apparent or Overnight	
	In case of Marginal Lending Account or Overnight	
	Deposit Account the Default MCA number must be	
	inserted in this field.	
Account	The date from which the related reference data	Date
Opening Date	should be active in the system. If not inserted, the	Selection
	Cash Account Opening date is set to the Activation	(YYYY-MM-
	date by default.	DD)

C) Default MCA		
Note: This field app	pears in the CRDM GUI in the reserve manage	ment account
configuration block		
Default Main Cash	This field is optional and in case the participant has	Tickbox
Account (O)	more than one MCAs then one (and only one) MCA	
	has to be defined as the default MCA.	
	The default MCA is the only account on which the	
	following operations are processed:	
	- update of credit line;	
	- marginal lending and overnight deposits;	
	- monetary policy operations other than standing	
	facilities e.g. open market operations;	
	-	
	- interest payment orders linked to marginal lending,	
	overnight deposits, minimum reserves and excess	

	reserves;	
	- infringement penalties regarding monetary policy	
	instruments (e.g. minimum reserves);	
	- any other activity carried out by CBs in their	
	capacity as CB of issue	
	In case the CB has more than one CLM CB account	
	then one (and only one) NCB CLM account must be	
	selected as a default MCA.	
D) Reserve Managen	nent Account Configuration	
Item	Description	Data
		validation
		rules
Minimum Reserve	This field identifies if the account being created is	Tickbox
Calculation (O)	included to the minimum reserve requirement	
	fulfillment. If the participant has a minimum reserve	
	requirement to be fulfilled using this specific Account	
	then this box must be ticked.	
Automated	This field indicates that Interest Payments are	Tickbox
Generation of	generated automatically by TARGET System. This	
Interest Payment	is ticked by default on behalf of the participant in the	
(System Generated)	registration form.	
E) Additional Accourt	nt Configuration	
Item	Description	Data
		validation
		rules
Default RTGS		Tickbox
Account		
Credit Based Only	All the CLM accounts owned by the participants are	Tickbox
(M)	credit based only accounts – this is always ticked by	
	default for the participants.	
	Only CLM CB Accounts can be not ticked.	
Co-managed (O)	This field is optional. It has to be used if the account	Tickbox
U (-/	will be co-managed.	
Non-published (O)	This field identifies if the MCA account BIC is not	Tickbox
1	published in the CLM repository (this repository is	

	-	
	only available to NCBs and is separate to the RTGS	
	directory).	
Co-manager Parent	This field identifies the Parent BIC of the Co-	BIC11
BIC (O)	Manager. If field 124 is ticked, then this field is	
	mandatory. This field allows the users of the party to	
	access the information related to the co-managee.	
	All roles and privileges then become applicable also	
	to the co-managed account.	
Co-manager Party	This field identifies the Party BIC of the Co-Manager.	BIC11
BIC (O)	If field 124 is ticked, then this field is mandatory. This	
	field allows the users of the party to access the	
	information related to the co-managee. All roles and	
	privileges then become applicable also to the co-	
	managed account.	
Maximum Amount to	Within this field the participant can limit the use of	Unlimited
be Debited per Day	the direct debit function by defining total sum of	amount
(O)	debits allowed by direct debit per day on this cash	
	account regardless of the issuer of direct debit	
	orders.	
	In CLM this only relates to a maximum amount set	
	by a participant which can be debited by a cross-	
	border CB.	
	This field is optional.	
F) Authorised Accou	Int User	
Item	Description	Data
		validation
		rules
Cash Account	This MCA has to be already created in the system.	
Number (M)		
Authorised Account	This field is mandatory and defines the BIC allowed	BIC11
User BIC (M)	to settle on the selected CLM account. (The account	
	BIC which is used for routing the cash transfers).	
	Each MCA has an authorised account user BIC	
	which is a distinct BIC11. This BIC11 cannot be used	
	as AAU for any other cash account within the same	

	service. It is expected that the same BIC is assigned	
	as AAU for the CLM MCA and the RTGS DCA of the	
	same participant.	
	If the number of AAUs to be inserted is greater than	
	8 Accounts, the participants are asked to include	
	them via text file, following the instructions included	
	in Annex C.	
Participation Type	This field identifies the participation types of the	
(M)	party BICs defined in field Authorised Account User	
	BIC.	
	For CLM the only available participation type is	
	Direct.	
	2	
	DIRE = Direct	
	MADI = Multi Addressee - Branch of Direct	
	Participant	
	MACI = Multi Addressee - Credit Institution	
	ADCO = Addressable BIC - Correspondent	
	ADDI = Addressable BIC - Branch of Direct	
	Participant	
	ADIN = Addressable BIC - Branch of Indirect	
	Participant	
	ADBC = Addressable BIC - Branch of	
	Correspondent	
	In case of Multi Addressee it is not possible to select	
	the wildcards.	
G) Direct Debit Mar	ndate (in CLM this is only relevant for particip	ants who are
mandating a cross-b	order NCB to debit their MCA)	
Item	Description	Data
		validation
		rules

Payee Parent BIC (O	This field identifies the Parent BIC of the Participant	BIC11
	(payee) which is allowed to issue direct debit instructions.	
	If the number of DDMs to be inserted is greater than	
	4, the participants are asked to include them via text	
	file, following the instructions included in Annex C.	
Payee Party BIC (O)	This field identifies the Party BIC of the Participant	BIC11
	(payee) which is allowed to issue direct debit	
	instructions.	
From Cash Account	This field identifies the account number of the CLM	
Number (O)	MCA to be debited. The account number must	
	already be an active account in the system or else a	
	new one should be defined in field 111.	
	This cash account must belong to the Party in the	
	header of this form.	
Payee Reference	This field identifies the reference that can be used in	
(M)	the direct debit.	
	The system will not check for this reference in	
	executing a direct debit but only for an existing	
	mandate. This reference is not included	
	automatically in the related pacs.010 message, also	
	there is no dedicated field for this purpose in the	
	pacs.010. However, there are some optional fields	
	in pacs.010 where references can be entered which	
	could fit this need e.g. the "End to End Identification"	
	could be used. It is possible that according to the	
	participants needs this field is already foreseen for a	
	different reference and in this case another optional	
	field could be used.	
Maximum amount	The maximum amount allowed to be directly debited	
per counterparty	by the payee party during a single business day	
Maximum amount	The maximum amount the authorized issuer is	
per payment	allowed to debit in a single direct debit	

NCB who wish to debit from an MCA owned by another NCB will need to have a direct debit mandate in order to do so.

5. Groups	(T2S Secured group Chapter 3)	
A) Liquidity transfer	group	
Item	Description	Data
		validation
		rules
Group Name (M)	This field identifies the name of the Liquidity Transfer	Free field,
	Group.	Char35 max
	In case of new Group Name a new Liquidity:	
	Transfer Group is created.	
	In case of existing Group Name the account in field	
	196 will be added to the existing group.	
	The name should follow the following format:	
	CCLBIC11XXXXXX-LTGR	
	- Country Code of the CB setting up the group:	
	2 Characters	
	- L: 1 character	
	- Party BIC of payment bank leader party: 11	
	Characters	
	1 character	
	- Optional further descriptive text: 20	
	characters	
Cash Account	This field identifies the Account Number of the MCA	
Number (M)	included in the Liquidity Transfer Group defined in	
	field 195.	
	Account number has to be the same as defined in	
	field 111.	

B) Banking group		
Group Name (C)	If this field is left empty the bank declares that they are a single institution and not a member of a banking group. This field identifies the name of the Banking Group used by the NCB for monitoring purposes. If filled with a new Group Name, a new banking group will be created. In case the Group Name already exists, the Party will be added to the existing	Free field, Char35 max
	group. Banking Groups are created by the relevant NCB (the NCB of the leader party), thus the participants have to request to be part of the group that has been created and communicated to each group member by the responsible NCB. For further information on Banking Groups please consult the T2 CI MUDES	
	Groups, please consult the <u>T2 CLM UDFS</u> (3.4 Types of groups) and the Annex B. Banking Group is mandatory when there is a Banking Group in existence which falls under the definition in Annex F.	
	The name should follow the following format: CCKBIC11XXXXX-BKGR - Country Code of leader CB: 2 Characters - K: 1 character	

Leader Parent BIC (C)	 Party BIC of payment bank leader party: 11 Characters - 1 character Optional further descriptive text: 20 characters This field must always be filled with the 	Prefilled
	BIC TRGTXE2SXXX. (Pre-filled in the form)	Trenneu
Leader Party BIC (C)	This field must be filled with the Party BIC of the Banking Group Leader, which is the corresponding Central Bank It must be equal to field 1 for the creation of a new banking group. This BIC will always be the same regardless of whether the group is being created or joined.	Free field, BIC11 only
C) Billing group	I	
Group Name (C)	This field identifies the name of the Billing Group. The first insertion of the group name will create the group. Further insertions of the group name will add members to the group.	
	The name should follow the following format: CCBBIC11XXXXX-BLGR - Country Code of (PB) leader party: 2 Characters - B: 1 character - Party BIC of payment bank leader party: 11 Characters - 1 character - Optional further descriptive text: 20 characters	
Leader Parent BIC (C)	This field must be filled with the Parent BIC of the Billing Group Leader.	

Leader Party BIC (C)	This field must be filled with the Party BIC	
	of the Billing Group Leader.	

6. REFERENCE DATA FOR RTGS PARTICIPANTS

For TARGET payment banks having at least one RTGS DCA the opening of a CLM MCA is mandatory.

For RTGS participants the following reference data has to be set-up by the responsible NCB (according to the registration form):

- Party reference data (including administrator users and invoice configuration) see chapter 3
- Cash Account reference data RTGS reference data described in this chapter
- Groups information (optional) reference data for RTGS groups described in this chapter

In addition (after the account reference data set-up by the CB) the participant may input (setup and modify) the following reference data in the CRDM:

- Cash Account Account Threshold Configuration: the reference data relating to floor/ceiling notification flags, target amounts and rule-based liquidity transfers for queued high/urgent payments/AS transfer orders
- Limits: Standing orders for limits
- Standing/predefined Liquidity Transfer Order: standing/predefined and floor/ceiling rule-based liquidity transfers
- Standing Order for Reservation
- Account monitoring group: setting up the account monitoring group and add members to the group
- Message subscription and Report configuration: setting-up message and report subscriptions
- Routing configuration (DN-BIC routing, default and conditional routing)

For more information on reference data input, please see the CRDM User Handbook. Ancillary Systems see also chapter 6.

6.1. CASH ACOUNT REFERENCE DATA AND OPTIONAL REFERENCE DATA

Cash account reference data and optional reference data for the setting up of groups is described in the following table:

2. Cash account N	ew/Edit	
A) Main informatio	on	
Item	Description	Data validation
		rules
Cash Account	Format: RCBEURPartyBIC11max 17 characters	Free field,
Number (M)	free text.	Char34 max
	Account type:	
	R=RTGS DCA	
	U=RTGS Sub Account	
	T=AS technical account	
	G= AS guarantee funds account	
	CB country code (see list of the country codes in the	
	Annex E)	
	Currency code=EUR	
	BIC=Party BIC11	
	Sub-classification=17 character free text	
	Each NCB will decide whether to leave the free text	
	to the parties in whole or in part or to leave it entirely	
	to the parties to determine. Please contact your NCB	
	for more information.	
	In case of RTGS sub-accounts (account type = "U")	
	the Ancillary System code (to be requested from	
	NCB) must be the first three characters of the 17	

	character free text. This code shows which AS uses	
	the sub-account in the context of procedure C.	
	If a party has more than one MCA or RTGS account,	
	the free text section is where the distinction between	
	the accounts is made (because the account number	
	has a Party BIC and not an Account BIC).	
	Each RTGS DCA has an authorised account user	
	BIC (defined in Field 130) which is a distinct BIC11.	
	This BIC11 cannot be used as AAU for any other	
	cash account within the same service. Participants	
	have the option to include this BIC11 in the free text.	
Cash Account	Combo box for entry of the account type.	
Type (M)	RTGS Dedicated Cash Account or RTGS sub-	
	account must be selected.	
Floor notification	Lower threshold for notifying the Account Holder	
amount (O)	and also the amount that is used to trigger a rule-	
	based LT in RTGS.	
	This field is used to define the value for triggering	
	notifications and this value is also the floor amount	
	which triggers the rule-based LT, if a target amount	
	has been flagged in the account threshold	
	configuration and the rule-based LT is created in	
	the Standing/Predefined LT order screen.	
	In case this amount is not specified, or it is set to	
	zero, no floor notification will be triggered.	
	In order to update this amount a new form must be	
	sent using the modify functionality.	
	Please see section 5.2 of this guide.	
Ceiling notification	Upper threshold for notifying the Account Holder	
amount (O)	and also the amount that is used to trigger a rule-	
	based LT.	

	This field is used to define the value for triggering notifications and this value is also the ceiling amount which triggers the rule-based LT, if a target amount has been flagged in the account threshold configuration and the rule-based LT is created in the Standing/Predefined LT order screen. In case this amount is not specified or it is set to zero, no ceiling notification will be triggered. In order to update this amount a new form must be	
	sent using the modify functionality.	
	Please see section 5.2 of this guide.	
Currency (M)	Always EUR	Dropdown
Linked Account	Only Cash Account can be selected here. This field	Dropdown of 2
Туре (М)	is mandatory when field 50 'Cash Account Type' is	values =
	a RTGS Sub-Account.	column O
Linked Account	This field identifies the number of the RTGS DCA (in	
Reference (M or	the case of creation of a RTGS sub-account) to	
not allowed)	which the Cash Account can be linked. This field	
	also identifies the number of the MCA (in case of	
	creation of an RTGS DCA).	
	This field is mandatory if field 54 is defined. It is not	
	allowed otherwise.	
B) Account thresh	old configuration	
Associated LT	This field identifies the CLM MCA which is linked	
Account (O)	through the 1:1 relationship with the RTGS DCA in	
	order to perform automated Liquidity Transfers. The	
	RTGS DCA must also be later inserted as an	
	associated LT account in the reference date of the	
	CLM MCA.	
Rule-based LT for	Select whether the rule-based LT for queued high	Tickbox
Queued High	priority payments, urgent payments or AS transfers	
Priority Payments	is configured or not	

Rule-based LT for	Select whether the rule-based LT for queued urgent	Tickbox
Queued Urgent	priority payments and/or Ancillary System transfer	
Priority	orders is configured or not	
Payments/AS		
Transfer Orders		
D) Reserve Manag	ement Account Configuration	I
Item	Description	Data validation
		rules
Minimum Reserve	This field identifies if the account is included in the	Tickbox
Calculation (O)	minimum reserve requirement fulfillment.	
Automated	This field indicates that Interest Payments are	Tickbox
Generation of	generated automatically by TARGET System.	
Interest Payment	Defined by default.	
(System		
Generated)		
E) Additional Acco	ount configuration	
Item	Description	Data validation
		rules
Default RTGS	This field identifies if the Authorised Account User	Tickbox
Account (M or C)	BIC for this account appears as "Main BIC" in the	
	RTGS directory.	
Credit Based Only	All the RTGS accounts owned by the participants	Tickbox
(M)	are credit based only accounts - this is always	
	ticked by default to the participants.	
	Only RTGS CB Accounts can be not ticked.	
Non-published	This field identifies if the RTGS DCA account BIC is	Tickbox
(O)	not published in the RTGS Directory.	
Maximum Amount	Within this field the participant can limit the use of	
to be Debited per	the direct debit function by defining total sum of	
Day (O)	debits allowed in its RTGS DCA by direct debits per	
	day regardless of the issuer of direct debit orders.	
	This field is optional.	
F) Authorised Account User		
Item	Description	Data validation
		rules

Authorised	Participation type Direct:	BIC11
Account User BIC	This field is mandatory and defines the account user	
(M)	BICs (one only) allowed to settle on the selected	
	RTGS account (This is the BIC used for routing the	
	credit transfers).	
	There is no need for the definition of an AAU BIC on	
	an RTGS sub-account as it is by definition the AAU	
	BIC of the related RTGS account.	
	It is expected that the same BIC is assigned as AAU	
	for the CLM MCA and the RTGS DCA of the same	
	participant.	
	Participation types Multi Addressee and	
	Addressable BIC:	
	A direct RTGS participant having multi addressee	
	and/or addressable BICs identifies the BICs in this	
	field.	
	Participants can define several BICs (please add	
	subfields/lines if needed).	
	Wildcard pattern usage (Wildcard rules are defined	
	by wildcard rule lines within a wildcard template. A	
	wildcard template is composed of at least a bank	
	code (only format check is to be done on the bank	
	code) and a wildcard character "*" which replaces	
	any following character. The wildcard character can	
	therefore be at any position from 5 to 11, but must	
	always be at the end of the wildcard template (e.g.	
	"MARK*"). It is also possible to have no wildcard	
	character in the template. In that case the wildcard	
	rule will apply to only one BIC (e.g.	
	"MARKDEFF100").) is possible only for multi-	
	addressee and addressable BICS	
Cash Account	Account number has to be the same than defined in	
Number (M)	field 49.	

Participation Type	This field identifies the participation types of the	
(M)	party BICs defined in field Authorised Account User	
	BIC.	
	Available party types are:	
	DIRE = Direct	
	MADI = Multi Addressee - Branch of Direct	
	Participant	
	MACI = Multi Addressee - Credit Institution	
	ADCO = Addressable BIC - Correspondent	
	ADDI = Addressable BIC - Branch of Direct	
	Participant	
	ADIN = Addressable BIC - Branch of Indirect	
	Participant	
	ADBC = Addressable BIC - Branch of	
	Correspondent	
G) Direct Debit Ma	indate	
Item	Description	Data validation
		rules
Payee Parent BIC	This field identifies the Parent BIC of the Participant	BIC11
(M)	(payee) which is allowed to issue direct debit	
	instructions.	
Payee Party BIC	This field identifies the Party BIC of the Participant	BIC11
(M)	(payee) which is allowed to issue direct debit	
	instructions.	
From Cash	This field identifies the account number of the RTGS	
Account Number	DCA to be debited.	
(M)	Account number has to be the same as defined in	
	field Cash Account Number.	
	This cash account must belong to the party defined	
	in the header of this form	
Payee Reference	This field identifies the payee reference used in	
(M)	setting up the direct debit.	
	The system will not check for this reference in	
	executing a direct debit but only for an existing	
	mandate. This reference is not included	
	automatically in the related pacs.010 message, also	

	there is no dedicated field for this purpose in the	
	pacs.010. However, there are some optional fields	
	in pacs.010 where references can be entered which	
	could fit this need e.g. the "End to End Identification"	
	could be used. It is possible that according to the	
	participants needs this field is already foreseen for a	
	different reference and in this case another optional	
	field could be used.	
Maximum amount	The maximum amount allowed to be directly debited	
per counterparty	by the payee party during a single business day	
Maximum amount	The maximum amount the authorized issuer is	
per payment	allowed to debit in a single direct debit	

5. Setting up grou	ps		
A) Liquidity transf	A) Liquidity transfer group		
Item	Description	Data validation	
		rules	
Group Name (M)	This field identifies the name of the Liquidity	Free field,	
	Transfer Group.	Char35 max	
	In case of new Group Name a new liquidity transfer		
	group is created.		
	In case of existing Group Name the account in field		
	196 will be added to the existing group.		
	The name should follow the following format:		
	CCLBIC11XXXXX-LTGR		
	- Country Code of the CB setting up the group:		
	2 Characters		
	- L: 1 character		
	- Party BIC of payment bank leader party: 11		
	Characters		
	1 character		
	- Optional further descriptive text: 20		
	characters		

Cash Account	This field identifies the account number of the RTGS	Free field,
Number (M)	DCA included to the Liquidity Transfer Group	Char34 max
	defined in field 195.	
	Account number has to be the same as defined in	
	field 111.	
B) Settlement ban	k account group	
Group Name (M)	This field identifies the name of the Settlement bank	Free field,
	account group being set up (in the case of an	Char35 max
	ancillary system) or the Group in which that account	
	will be included in the case of a bank joining an	
	existing settlement bank account group.	
	The first insertion of the group name will create the	
	group. Further insertions of the group name will add	
	members to the group.	
	The group can only be created by an ancillary	
	system (see chapter 7 for the full procedure).	
	The name should follow the following format:	
	CCSBIC11XXXXX-SBAG	
	- Country Code of (AS) leader party: 2	
	Characters	
	- S: 1 character	
	- Party BIC of payment bank leader party: 11	
	Characters	
	1 character	
	- Optional further descriptive text: 20	
	characters	
Cash Account	This field identifies the account number of the RTGS	Free field,
Number (M)	DCA included in the already existing Settlement	Char34 max
	bank account group. The account number has to be	
	the same as defined in field 111 if a new cash	
	account is being set up	
	This cash account number can only be added by the	
	settlement bank.	

7. REFERENCE DATA FOR ANCILLARY SYSTEMS

This section deals with the AS –specific fields in the form. For information on how to complete the rest of the fields in sections 1(Party) and 2 (Cash Account), please refer to chapters 3, 4, 5 and 8. In order to create an RTGS account, please refer to chapter 6.

7.1. REGISTRATION PROCEDURES

7.1.1. PROCEDURES APPLICABLE TO ANCILLARY SYSTEM REGISTRATION

In order to be registered in the Service, an Ancillary System must submit the registration form to the NCB for the set-up of:

- AS Party (Party type Ancillary System in field Party type of the Form) and AS Settlement Procedure(s), section 2H, select the relevant procedures in field 160.
- b. The AS Technical Account needs to be created in field Cash Account Number, section 2A, mandatory for AS Settlement Procedures A, B, C, D and optional for AS Settlement Procedure E. The Ancillary system technical account must be selected in field Cash Account Type and then the account must be linked to the relevant AS procedures in Field Procedure (Section 3B)
- c. Settlement Bank Account Group, section 5, Setting up groups, B) Settlement bank account group. The ancillary system creates the original group by inserting the group name in field Group Name. The payment bank who wishes to be part of this group inserts the group name in field Group Name and their cash account number in field Cash Account Number.
- d. The payment bank must ensure the signature of the ancillary system is on the registration form. A separate form is generated for this purpose with minimal payment bank registration details. (The Cross-border procedure is explained in a later section.)

If an AS is authorised to open an RTGS DCA and consequently an MCA then it has to be also registered as RTGS and CLM Account holder via the *Service Party Type* object in the respective *Party Service Link*. In this case, no procedure applies, the Ancillary System is treated as any other CLM and RTGS account holder.

Format of Cash accounts for Ancillary systems

Format: RCBEURPartyBIC11max 17 characters free text.

Account type: T=AS technical account G= AS guarantee funds account

CB country code (see list of the country codes in the Annex E) Currency code = EUR BIC = Party BIC11 Sub-classification = 17 character free text

If an AS requests the opening of a T2S/TIPS DCA, then it cannot do so using the AS party., A second Payment Bank party (using a different party BIC) must be opened in order to be registered as a T2S/TIPS Account holder. In such cases, no procedure would apply, the Ancillary System is treated as any other T2S or TIPS account holder.

The registration form needed for:

- 1. the set-up of the Ancillary System Party (mandatory)
- 2. the configuration of the AS Settlement Procedures (optional)
- 3. the set-up of the Settlement Bank Account Group (mandatory for AS procedure users)
- 4. the creation of an AS Technical/Guarantee Fund Account (optional)

will have to be submitted by the AS to its responsible NCB for the configuration of the reference data in CRDM.

Each settlement bank is responsible to request to its relevant CB the inclusion of its RTGS DCA(s) and/or RTGS sub-account in a Settlement Bank Account Group via a registration form with the required information included in section **5. Setting up groups, B) Settlement bank account group**. This form has to be also signed by the Ancillary System the Settlement Bank Account Group refers to.

The responsible CB of a settlement bank requesting the inclusion of its RTGS DCA(s) and/or RTGS sub-account in a Settlement Bank Account Group has to check if the registration form is signed by both parties (namely the AS and the settlement bank).

In case a settlement bank requests the inclusion of its RTGS DCA(s) and/or RTGS subaccount in a Settlement Bank Account Group for which another CB is responsible, the responsible CB of the settlement bank has to forward the registration form to the relevant CB for the check of the signature of the AS. Once the confirmation is received that the form is correctly signed by the AS, the responsible CB of the settlement bank can proceed with the inclusion of the RTGS DCA(s) and/or RTGS sub-account in the Settlement Bank Account Group.

One AS can make use of several settlement procedures but only one Settlement Bank Account Group can be defined at the level of the AS.

In case procedure A, B, C or D it is used, one dedicated AS Technical Account has to be opened for each procedure used. In case procedure E it is used, it is possible to reuse the technical account from AS settlement procedure C.

- In <u>section 1.Party, A) Main info</u>: party type "Ancillary System" has to be selected in field
 22
- In <u>section 1.Party, C) Party Service Link</u>: service "T2 RTGS Component" has to be selected in field 24 together with Party Type "Ancillary System" in field 34
- If the AS is opening a CLM MCA then "T2 CLM component" must be selected in the field "Service" (field 33)
- Section <u>2.Cash Account</u> is mandatory for the registration of an AS Technical Account if the Ancillary System will make use of at least one of the AS Settlement Procedures A, B, C, D. One dedicated AS technical account has to be opened for each AS settlement procedure used. Only for AS settlement procedure E it is possible to reuse the technical account from AS settlement procedure C.

3. Ancillary System				
B) Ancillary System Procedures				
Item	Description	Data validation		
		rules		
Procedure (O)	Dropdown values for the entry of the AS			
	Settlement procedure to be configured for the			
	Ancillary System Party.			
	This section can be filled in multiple times in case more than one procedure has to be configured. This can be left blank and in this case no procedure is configured.			

• For section <u>3.Setting up AS procedure</u> please refer to the following table:

Ancillary System	Account number of the Ancillary System	Free field,
Technical Account	Technical Account specified for the AS	Char34 max
(C)	Settlement Procedure.	
	Condition: This field is mandatory in case of	
	Procedure A, B, C or D, optional in case of	
	Procedure E.	
	This cash account must be defined on the same	
	form or already exist in the system	
Ancillary System	Account number of the Ancillary System	Free field,
Guarantee Funds	Guarantee Funds Account that may be specified	Char34 max
Account (O)	in case of AS Settlement Procedure A or B. This	
	cash account must be defined on the same form	
	or already exist in the system	
Single/Global	Condition : Only to be used in case of Procedure	
Notification (C)	E, this field indicates whether the Ancillary	
	System opted for receiving a global notification	
	after finalisation (settlement, cancellation or	
	rejection) of all individual AS transfers sent within	
	one AS batch message or for each single AS	
	transfer in a batch (select Single or Global)	

• For the (optional) registration of an Ancillary System Bilateral Agreement for cross-AS settlement, please refer to the following table:

3. Setting up AS procedure

Number (C)	to be included in the Settlement bank account	Char34 max
	group.	
	When an Ancillary System submits the registration	
	form for the collection of its reference data and for	
	the set-up of the group, this field must be blank.	

When the	payment bank	submits	the for	m to jo	oin
an exist	ng group this	field mu	ust cor	ntain t	he
relevant	ccount number				

Each settlement bank is responsible for requesting to its relevant CB the inclusion of its RTGS DCA(s) and/or RTGS sub-account in a Settlement Bank Account Group via a registration form with the required information included in section **5.1. Setting up groups, b) Settlement bank account group**. This form has to be also signed by the Ancillary System owning the Settlement Bank Account Group.

7.2. DELETION OF AN RTGS DCA OR A SUB ACCOUNT LINKED TO A SETTLEMENT BANK ACCOUNT GROUP

In case a settlement bank wants to request the deletion of one or more of its RTGS DCA(s) and/or RTGS sub-account from a Settlement Bank Account Group, it has to submit to its relevant CB a registration form with the required information included in section **5. Setting up groups, B) Settlement bank account group**. The form has to be submitted in delete mode selecting the value "Close" in field 3 – Form Type.

The form has to be also signed by the Ancillary System the Settlement Bank Account Group refers to.

The responsible CB of the settlement bank requesting the deletion of its RTGS DCA(s) and/or RTGS sub-account from a Settlement Bank Account Group has to check if the registration form is signed by both parties (namely the AS and the settlement bank).

In case a settlement bank requests the deletion of its RTGS DCA(s) and/or RTGS sub-account from a Settlement Bank Account Group for which another CB is responsible, the responsible CB of the settlement bank has to forward the registration form to the relevant CB for a check of the signature of the AS.

Once confirmation is received that the form is correctly signed by the AS, the responsible CB of the settlement bank can proceed with the deletion of the RTGS DCA(s) and/or RTGS subaccount from the Settlement Bank Account Group.

8. REFERENCE DATA FOR T2S DCA HOLDERS

The previous Form 7300 is integrated into the T2 Registration form.

The creation and closure of a T2S party and a T2S DCA is performed by the responsible NCB, based on the reference data form(s) received from the T2S party/T2S DCA holder.

Once the T2S DCA is opened, the T2S DCA holder must contact the relevant CSD(s) in order to complete the set up and perform the link of the T2S DCA to the securities account(s).

In case a T2S DCA holder intends to close a T2S DCA, it should inform its NCB and the relevant CSD(s). Subsequently it should request the CSD(s) to remove the link(s) between the T2S DCA and the securities account(s) and, once all the link(s) have been removed, it can request the NCB to close the T2S DCA. Upon closure, it will not be possible to use the T2S DCA for securities settlements or liquidity transfers anymore. Therefore, no formal communication is envisaged between the NCB and CSDs as regards the registration of T2S DCA holders. It is the T2S DCA holder's responsibility to request the respective CSD(s) to create or remove the link(s) of the T2S DCA to the securities account(s) when requesting the opening or closure of a certain T2S DCA. The T2S DCA cannot be closed if the relevant links are not removed.

The form for the collection of the reference data for a T2S party/T2S DCA collects information that should be inserted via CRDM as well as additional information regarding:

(i) the technical address to send daily securities valuations via flat files: this information should be filled by the T2S party in case it offers client auto-collateralisation and should be forwarded by the NCB to the T2S Service Desk.

The T2S Service Desk will include it in the list of technical senders authorised to send securities valuations via flat files, thus enabling the T2S DCA holder to provide T2S the information regarding the valuation of its eligible securities for client auto-collateralisation.

(ii) information that might be used by the collateral management system (CMS) in order to handle the processes related with the automatic auto-collateralisation processes, in particular:

- the identification of the RTGS account for automatic auto-collateralisation reimbursement, via the RTGS account BIC and RTGS account holder MFI code (information via the form);

- the identification of the securities account for collateral supply, via the securities account number and the CSD and CSD participant BIC

For T2S DCA Holders the following reference data has to be set-up by the responsible NCB (according to the registration form):

- Party reference data (see chapter 3) and additional information, including:
 - Additional party information for T2S service
 - o Administrator users
 - Secured Group information (optional)
 - Secondary CMB Client auto-collateralisation
 - Invoice configuration
- Dedicated Cash Account (DCA) reference data T2S DCA reference data described in this chapter

In addition, (after the reference data mentioned above set-up by the CB) T2S DCA Holders may input (set-up and modify) the following reference data via the T2S GUI/CRDM:

- Standing/Predefined Liquidity Transfer
- Optional Cash Sweep
- Account monitoring group
- Message Subscription Rule Set/ Message Subscription Rule
- Report configuration
- Creation of users/Access rights management
- Network configurations, to define the Distinguished Names (DNs) to be used for routing in the various business contexts
- Secondary CMB

For further information, please see T2S UHB/CRDM UHB.

T2S DCA reference data and the respective fields on the reference data form are described in the following table:

8.1. SPECIAL PROCEDURES FOR T2S

In the following, special procedures for T2S are described.

1) Update of the external RTGS account/MCA list in the T2S platform

Note: This procedure is only needed, if CRDM and theT2S GUI are used for reference Data input in parallel

The T2S platform will maintain a list of external RTGS accounts/MCAs, which is required to validate the beneficiary account when processing outbound liquidity transfers (from a T2S DCA to a RTGS DCA/MCA). If a RTGS account/MCA mentioned as beneficiary is not included in the list of external RTGS accounts/MCAs, a liquidity transfer pulling funds or for a cash sweep will be rejected. It should be noted that the RTGS account numbers/MCAs included in this list are visible to T2S DCA holders that are directly connected to T2S (however, neither the BIC nor the name of the account holding institution are visible – unless it can be derived as part of the RTGS account number/DCA)⁶.

In this context, all RTGS accounts/MCAs that can possibly receive liquidity transfers from a T2S DCA should be included in the T2S list of external RTGS accounts/MCAs. This means that all RTGS accounts/MCAs should be included in the list, with the exception of

⁶ Each T2S DCA holder can just see the RTGS accounts/DCAs within the data scope of its NCB.

mirror/technical accounts and unpublished RTGS accounts (unpublished BICs in the RTGS and CLM Directory)⁷.

Thus, any RTGS account/MCA that is to be created, amended or deleted by a given NCB (and is not a mirror/technical account, or an unpublished account) should also be created, amended or deleted from the T2S list of external RTGS accounts/MCAs by the responsible NCB. Note, that the code to identify TARGET2 as external RTGS system in T2S is "TRGT".

2) <u>Registration of a T2S DCA holder linked to a RTGS account/MCA in the books of</u> <u>another NCB</u>

In case the T2S DCA is opened in the books of an NCB but is linked to a RTGS account/MCA opened in the books of a different NCB, the former will ask the latter to take note of the link. The latter has to check the validity of the signature(s) of the RTGS account/MCA holder included in the form. For this, a copy of the form will be sent to the NCB responsible for the RTGS account/MCA following the local sending/receiving requirements (e.g. electronically). This exchange is to be followed also in case the RTGS account/MCA to which the T2S DCA is linked is changed.

An NCB having in its books a RTGS account/MCA which is linked to a T2S DCA opened in the books of a different NCB should inform the T2S DCA holding NCB in case the RTGS account/MCA is to be deleted. Similarly, the T2S DCA holding NCB should inform the NCB that is holding the RTGS account/MCA in case of the deletion of the T2S DCA.

⁷ Unpublished accounts may be included in the list by the NCB, upon request of the participant.

8.2. REFRENCE DATA FOR TIPS PARTIES

This section is dedicated to the description of TIPS reference data that must be configured by the responsible NCB (with the information filled on the registration form). Party reference data that is relevant to TIPS (as well as other TARGET services) is described in chapter 3.

There are additional reference data objects that fall under the responsibility of the participants, and that should be set-up afterwards (not in the scope of this guide):

- Creation of Users/access rights management
- Network configurations, to define the Distinguished Names (DNs) to be used for routing in the various business contexts;
- Message subscription, to subscribe messages and manage rule sets;
- Report configurations, to subscribe reports and manage report delivery;
- Liquidity management configurations, to manage (create/update/delete) limits and liquidity transfer orders (predefined/standing/automated);
- Setting up of TIPS Credit Memorandum Balance (CMB).

For more information on these configurations please check TIPS UDFS and CRDM UHB/UDFS or contact your NCB.

Non-MMF investment funds	S.124
Financial corporations other than MFIs, non-MMF investment funds, financial auxiliaries, captive financial institutions and money lenders, insurance corporations and pension funds	S.125
Financial auxiliaries	S.126
Captive financial institutions and money lenders	S.127
Insurance corporations	S.128
Pension funds	S.129
Central government (excluding social security funds)	S.1311
State government (excluding social security funds)	S.1312
Local government (excluding social security funds)	S.1313
Social security funds	S.1314
Households	S.14
Non-profit institutions serving households	S.15

Annex B

Groups description

Group type	Description
Banking Group	A Banking Group is an optional group of parties which can be used in the CLM. It grants a collective view over the liquidity of the involved parties to CBs. A Banking Group is used for liquidity monitoring purposes of CBs. CBs can set up a Banking Group and specify the name of this group in CRDM. The CB which sets up the Banking Group is defined as leader party of the Banking Group.
Liquidity Transfer Group	A Liquidity Transfer Group is an optional group of MCAs. CBs can set up Liquidity Transfer Groups to allow intra-CLM liquidity transfers between them (not for liquidity monitoring purposes). CBs can set up a Liquidity Transfer Group and specify the name of this group. Each CB can then optionally add MCAs for which it is responsible to a Liquidity Transfer Group. An MCA can be included in one or several Liquidity Transfer Group(s).
	A Settlement Bank Group is a group that contains the list of accounts used for ancillary system settlement.

Group type	Description
	The billing group allows its members to benefit from the degressive pricing. The group may only include RTGS DCA holders belonging to the same banking group.

Annex C

Instructions for Authorised Account User text files

Please note that the txt file to create the Authorised Account Users must follow the below order and contain the following information: Cash Account Number, Authorised User Bic, Maximum IP Amount, Participation Type.

Be reminded that the Maximum IP Amount is the maximum amount accepted by the TIPS Participant or Reachable Party for an incoming Instant Payment Transaction and can be inserted only by TIPS participants.

The possible values for Participation Type are:

- DIRE = Direct
- MADI = Multi Addressee Branch of Direct Participant
- MACI = Multi Addressee Credit Institution
- ADCO = Addressable BIC Correspondent
- ADDI = Addressable BIC Branch of Direct Participant
- ADIN = Addressable BIC Branch of Indirect Participant
- ADBC = Addressable BIC Branch of Correspondent

EXAMPLE OF TXT FILE CONTENT for TIPS Participants (the spaces must be included)

DE111000000123456, DE00000XXXY, 10000000, DIRE

DE222000000123456, DE00000XXXY, 10000000, DIRE

DE333000000123456, DE00000XXYY, 10000000, ADIN

DE444000000123456, DE00000XYYY, 10000000, ADBC

EXAMPLE OF TXT FILE CONTENT for non-TIPS Participants (the space between the BIC and the participation type must be included)

DE11100000123456, DE00000XXXY, , DIRE

DE22200000123456, DE00000XXXY, , DIRE

DE33300000123456, DE00000XXYY, , ADIN

DE444000000123456, DE00000XYYY, , ADBC

Instructions for Direct Debit Mandates text files

Please note that the txt file to create the Direct Debit Mandates must follow the below order and contain the following information: Payee Parent BIC, Payee Party BIC, From Cash Account Number, Payee Reference, Maximum Account Per Counterparty, Maximum Account Per Payment.

EXAMPLE OF TXT FILE CONTENT (the spaces must be included)

DE00000XXXY, DE00000YYYY, DE111000000123456, DEREFXXX, 100000, 1000

Instructions for Technical Addresses text files

Please note that the txt file to create technical addresses must follow the below order and contain the following information: Technical Address, Network Service. Be reminded that the file must be semicolon-separated and include the below spaces.

EXAMPLE OF TXT FILE CONTENT

ou=bgutdeff,o=swift; T2CLM.SWIFT.FILESNF; ; ; ou=bgutdeff,o=swift; T2CLM.SWIFT.MSGSNF; ; ; ou=bgutdeff,o=swift; T2CLM.SWIFT.MSGRT; ; ; ou=bgutdeff,o=swift; T2RTGS.SWIFT.FILESNF; ; ; ou=bgutdeff,o=swift; T2RTGS.SWIFT.MSGSNF; ; ;

List of Country Codes

The complete list of country codes can be consulted here.

Annex F

Definition of Banking Group

(1) **'banking group**' means:

- a composition of credit institutions included in the consolidated financial statements of a parent company where the parent company is obliged to present consolidated financial statements under International Accounting Standard 27 (IAS 27), adopted pursuant to Commission Regulation (EC) No 2238/2004 and consisting of either: (i) a parent company and one or more subsidiaries; or (ii) two or more subsidiaries of a parent company; or
- a composition of credit institutions as referred to in subparagraph (a)(i) or (ii), where a parent company does not present consolidated financial statements in accordance with IAS 27, but may be able to satisfy the criteria defined in IAS 27 for inclusion in consolidated financial statements, subject to the verification of the CB of the participant;
- c) a bilateral or multilateral network of credit institutions that is: (i) organised through a statutory framework determining the affiliation of credit institutions to such a network; or (ii) characterised by self-organised mechanisms of cooperation (promoting, supporting and representing the business interests of its members) and/or economic solidarity going beyond the ordinary cooperation usual between credit institutions whereby such cooperation and solidarity are permitted by credit institutions' by-laws or articles of incorporation or established by virtue of separate agreements and in each cases referred to in points (c)(i) and (c)(ii) the ECB's Governing Council has approved an application to be considered as constituting a banking group;
